Copy Data Operation

Step 1: Creating a Resource Group

Step 2:

- Entered the resource group name
- Selected the appropriate Azure Subscription
- Chose the Region
- Click Review + Create

MICROSOFT AZURE

Step 3: Create Storage Account

The screenshot shows the Microsoft Azure Resource Manager console. The top navigation bar includes the 'Create' button, which is highlighted with a red box. Below the navigation bar, the 'Resource groups' section is visible, showing a table with columns for 'Name', 'Subscription', and 'Location'. The table contains one entry: 'Assignment' under the 'Subscription' 'Azure subscription 1' and 'Location' 'East US'. The left sidebar shows the 'Resource groups' section expanded, with various tools and options listed.

The screenshot shows the Microsoft Azure Marketplace search results for 'storage account'. The search results are displayed in a grid of cards. The card for 'Storage account' by Microsoft is highlighted with a red box. The card includes the Microsoft logo, the product name 'Storage account', a description 'Use Blobs, Tables, Queues, Files, and Data Lake Gen 2 for reliable, economical cloud storage.', and a 'Create' button. Other cards visible include 'Storage Account Using ARM', 'Storage task - Azure Storage Actions', 'Azure Storage Mover', 'Storage Lifecycle Management v2', 'RamSoft Image Storage', 'Blob Storage Digests Backed by Confidential Ledger', 'Azure Storage solution for Sentinel', and 'S3 API for Azure Blob Storage (FlexifyIO)'.

The screenshot shows the Microsoft Azure Marketplace page for 'Storage account'. The page includes the product name 'Storage account', the publisher 'Microsoft | Azure Service', and a star rating of 4.2 (1885 ratings). Below this, there is a section for 'Plans' with a table showing the 'Storage account' plan. The 'Create' button is highlighted with a red box. The page also includes an 'Overview' section with a description of the service and a 'More products from Microsoft' section with links to other services like 'Active Directory Health Check', 'AD Replication Status', 'Device Update for IoT Hub', and 'Front Door and CDN profiles'.

MICROSOFT AZURE

Configure the storage settings

- Select the subscription.
- Select the previously created Resource Group.
- Enter a unique Storage Account name.
- Select the appropriate region/performance settings.
- Click Review + Create

Create a storage account

Basics Advanced Networking Data protection Security Encryption Tags Review + create

Azure Storage is a Microsoft-managed service providing cloud storage that is highly available, secure, durable, scalable, and redundant. Azure Storage includes Azure Blobs (objects), Azure Data Lake Storage Gen2, Azure Files, Azure Queues, and Azure Tables. The cost of your storage account depends on the usage and the options you choose below. [Learn more about Azure storage accounts](#)

Project details
Select the subscription in which to create the new storage account. Choose a new or existing resource group to organize and manage your storage account together with other resources.

Usage Information + Support

Ratings + Reviews

Integrate data silos with Azure Data Factory, a service built for all data integration needs and skill levels. Easily construct ETL and ELT processes code-free within the intuitive visual environment, or write your own code. Visually integrate data sources using more than 90+ natively built and maintenance-free connectors at no added cost. Focus on your data - the serverless integration service does the rest.

- No code or maintenance required to build hybrid ETL and ELT pipelines within the Data Factory visual environment
- Cost-efficient and fully managed serverless cloud data integration tool that scales on demand
- Azure security measures to connect to on-premises, cloud-based, and software-as-a-service apps with peace of mind
- SSIS integration runtime to easily rehost on-premises SSIS packages in the cloud using familiar SSIS tools

MICROSOFT AZURE

The screenshot shows the Microsoft Azure portal interface. On the left, the navigation pane is open, showing the 'Containers' section under 'Data storage'. The main area displays the 'Containers' page for the storage account 'evanpunnen98476'. A 'New container' dialog box is open on the right. The 'Name' field is set to 'source' and is highlighted with a red box. The 'Anonymous access level' is set to 'Private (no anonymous access)'. Below this, there is a message: 'The access level is set to private because anonymous access is disabled on this storage account.' Under the 'Advanced' section, the 'Encryption scope' is set to 'Select from existing account scopes'. At the bottom of the dialog, the 'Create' button is highlighted with a red box.

Create the Destination Container

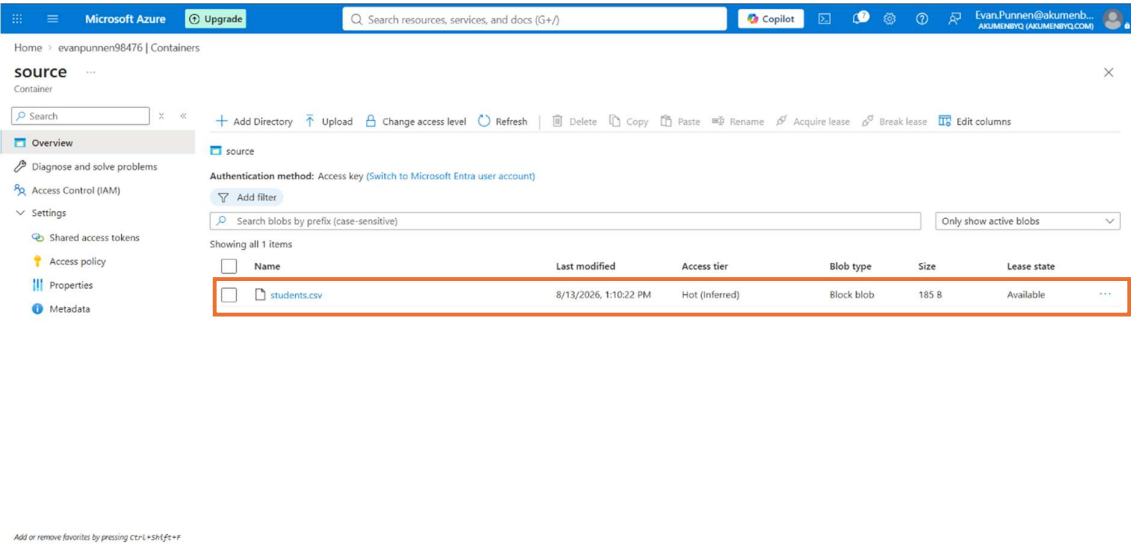

The screenshot shows the Microsoft Azure portal interface. On the left, the navigation pane is open, showing the 'Containers' section under 'Data storage'. The main area displays the 'Containers' page for the storage account 'evanpunnen98476'. A 'New container' dialog box is open on the right. The 'Name' field is set to 'destination' and is highlighted with a red box. The 'Anonymous access level' is set to 'Private (no anonymous access)'. Below this, there is a message: 'The access level is set to private because anonymous access is disabled on this storage account.' Under the 'Advanced' section, the 'Encryption scope' is set to 'Select from existing account scopes'. At the bottom of the dialog, the 'Create' button is highlighted with a red box.

MICROSOFT AZURE

Step 6 : Upload files to source container

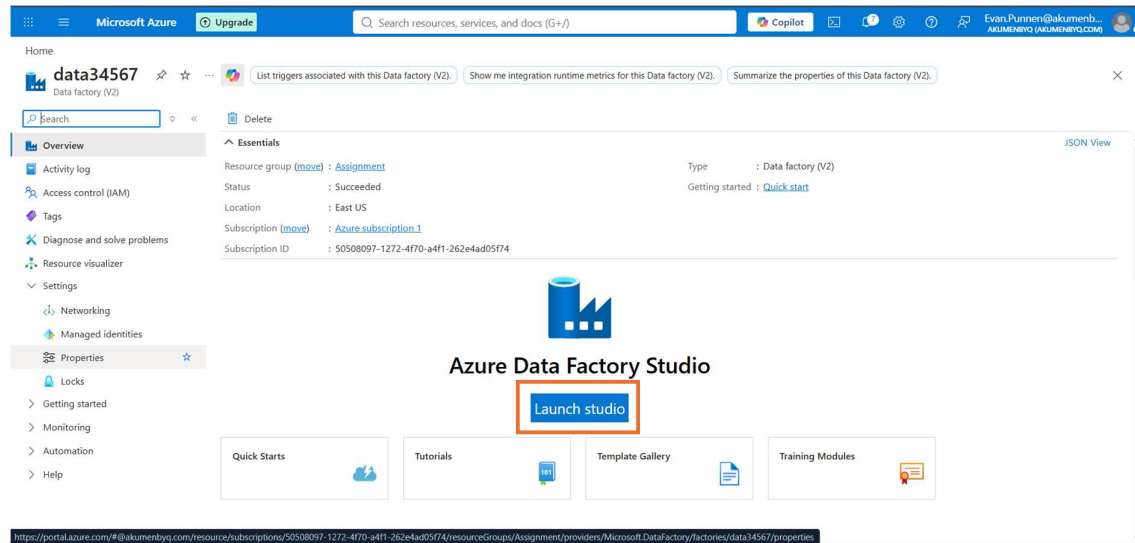

File Uploaded to Source Container

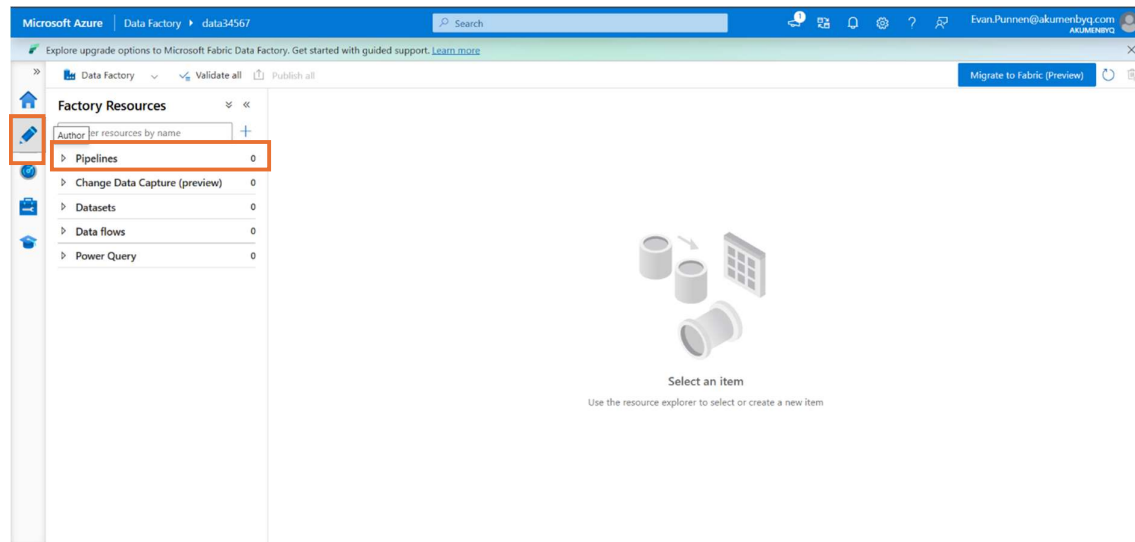

MICROSOFT AZURE

Step 7: Open Azure Data Factory Studio

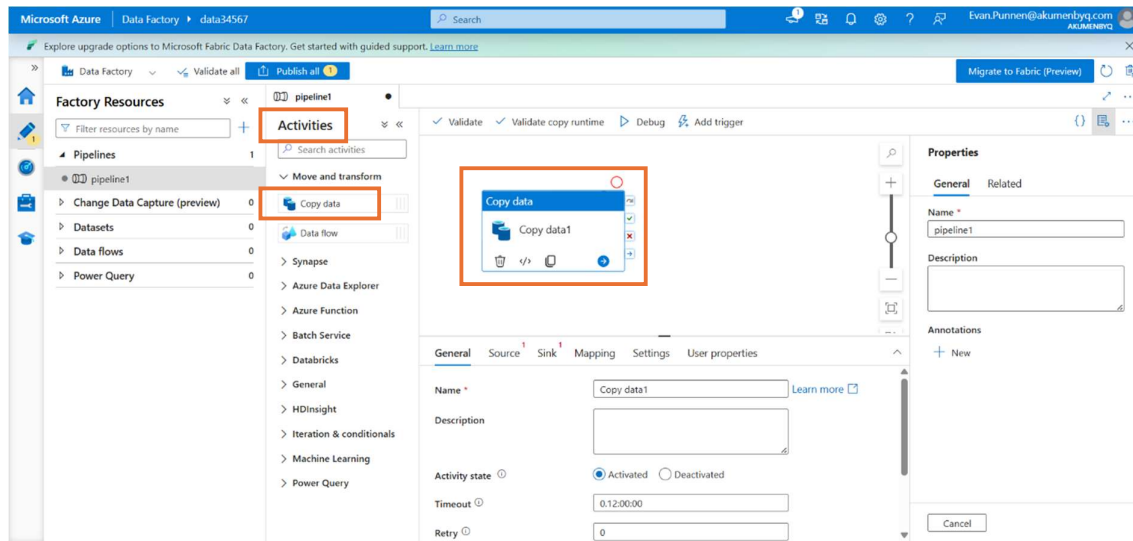

- Choose Author
- Select New Pipeline

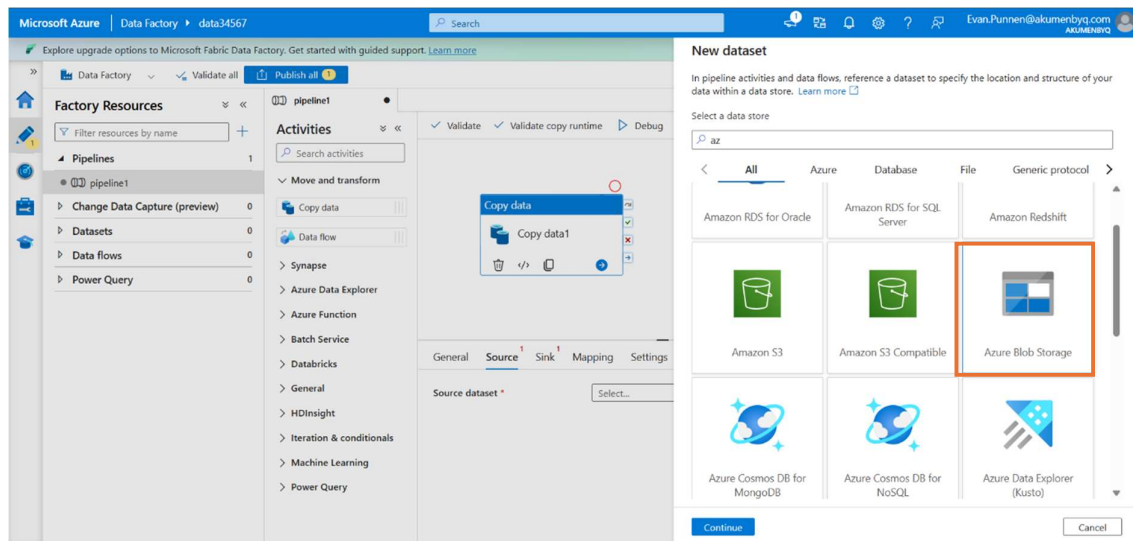

MICROSOFT AZURE

From the Activities , Drag and Drop Copy Data (From Move And Transform)

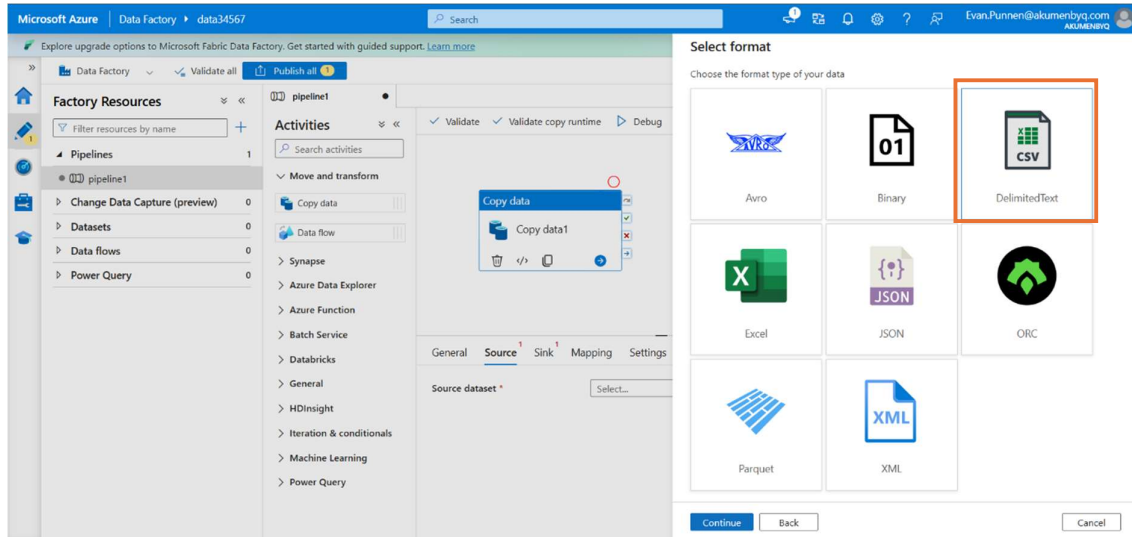

Create the Source Dataset

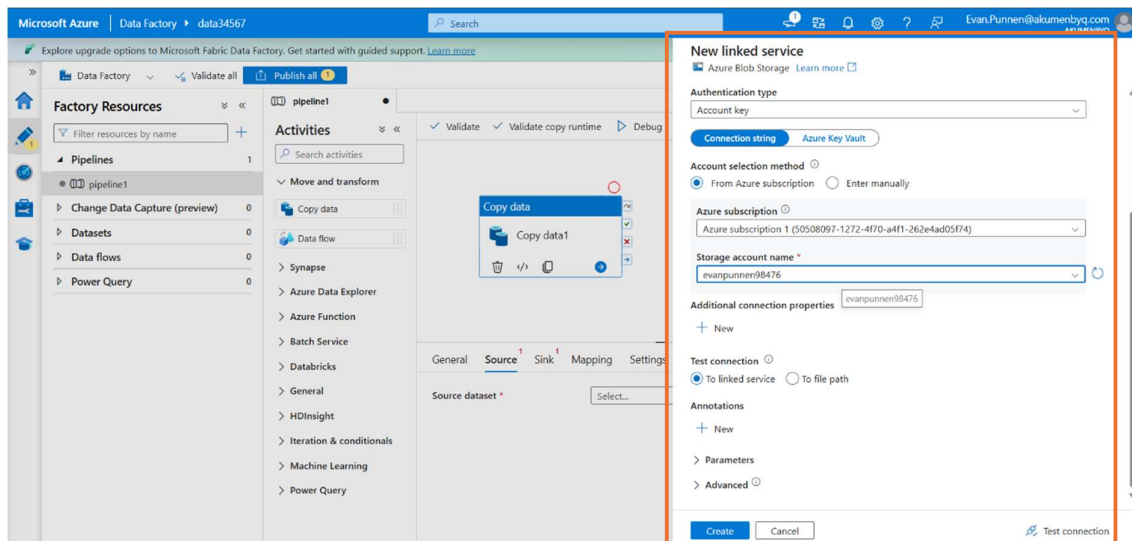

MICROSOFT AZURE

Choose Appropriate File Format

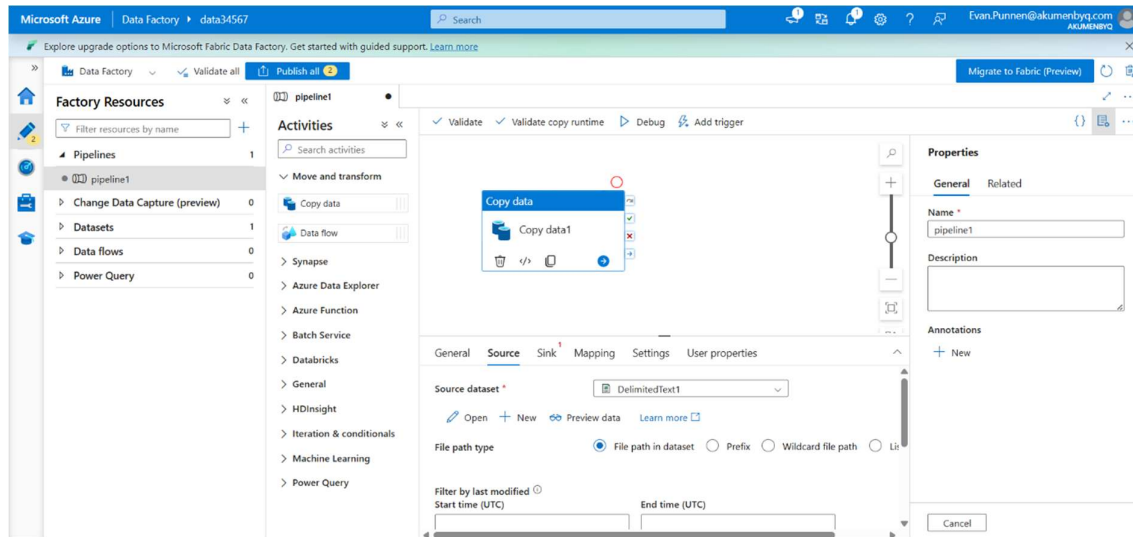

Configure the Linked Service

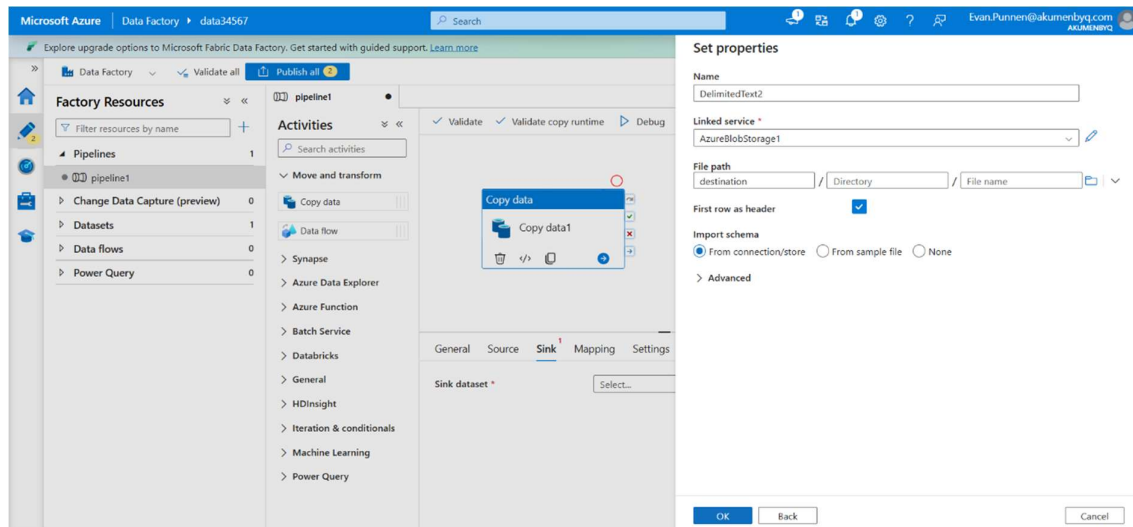

MICROSOFT AZURE

Configure the Activity (File Path Type -File Path in Dataset)

Browse and Select the Source File and Add the File Path in Source

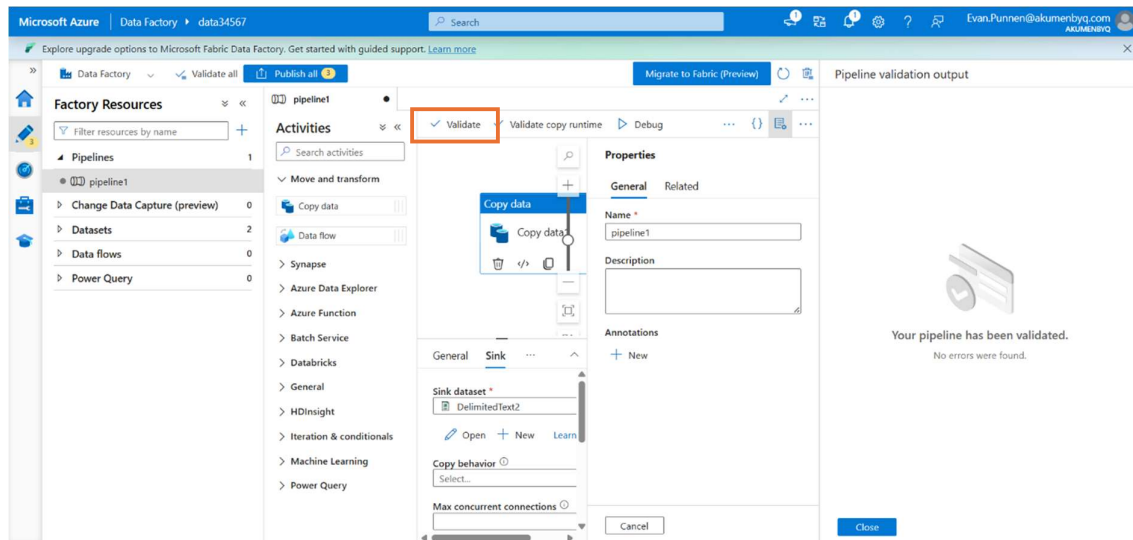

Browse the Destination Folder in Sink

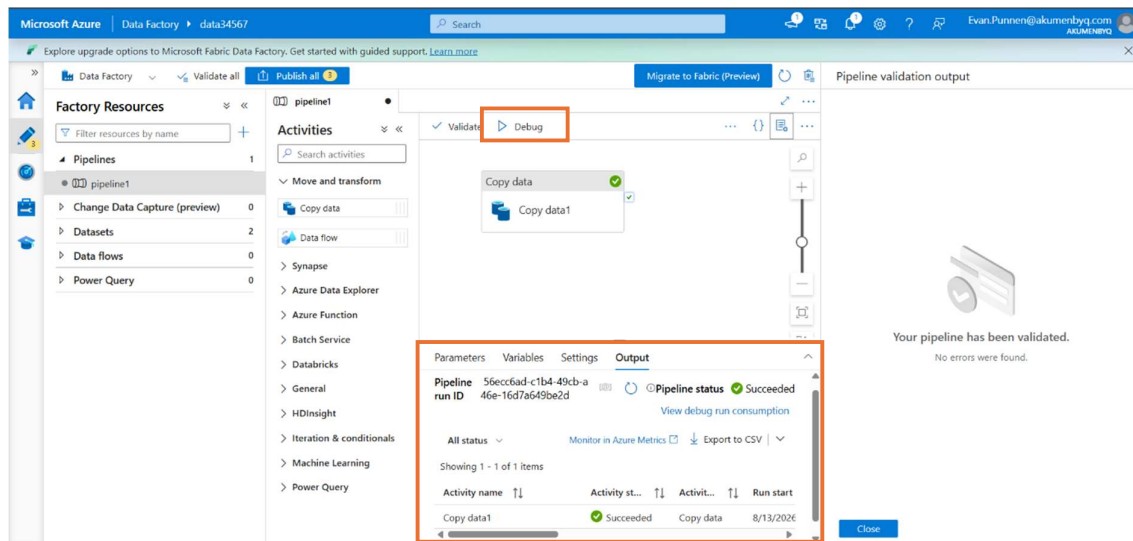

MICROSOFT AZURE

Validate the Pipeline

Debug it

MICROSOFT AZURE

After the Pipeline Run ,the File which was inside the Source folder is Copied to the Destination Container

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, an 'Upgrade' button, a search bar, and a user profile. The main content area is titled 'destination' and shows a list of blobs. A red box highlights the file 'students.csv'.

Name	Last modified	Access tier	Blob type	Size	Lease state
students.csv	8/13/2026, 1:16:28 PM	Hot (Inferred)	Block blob	185 B	Available

Upload more files to perform more copy data operations

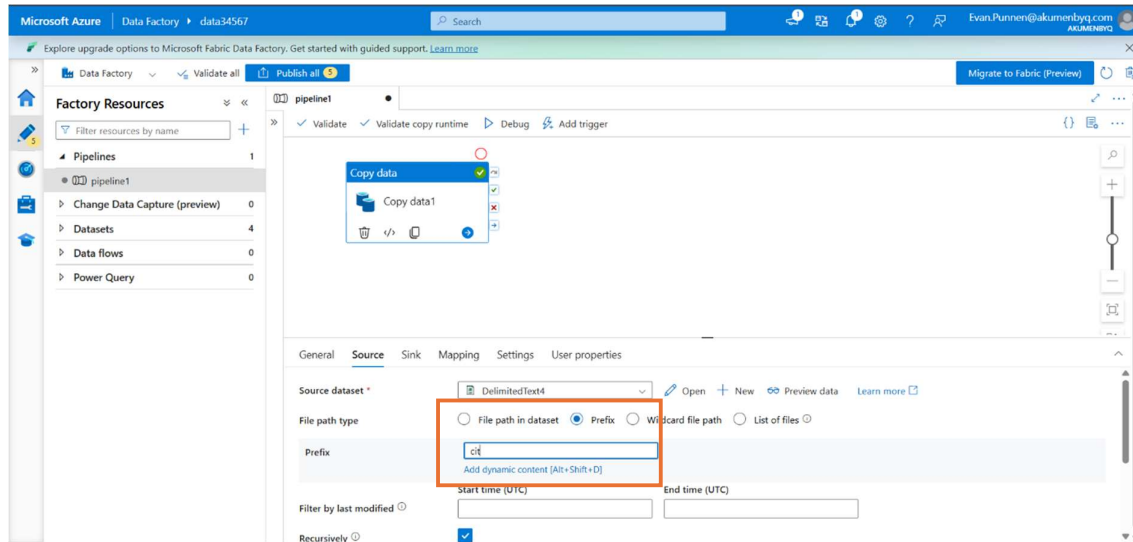

The screenshot shows the Microsoft Azure portal interface. The main content area is titled 'source' and shows a list of blobs. A red box highlights the first four files: 'Cloud-Services-aaS-PaaS-and-SaaS.pptx', 'cities.txt', 'cities1.txt', and 'cities2.txt'.

Name	Last modified	Access tier	Blob type	Size	Lease state
Cloud-Services-aaS-PaaS-and-SaaS.pptx	8/13/2026, 1:20:01 PM	Hot (Inferred)	Block blob	3.83 MiB	Available
cities.txt	8/13/2026, 1:19:59 PM	Hot (Inferred)	Block blob	8 B	Available
cities1.txt	8/13/2026, 1:19:59 PM	Hot (Inferred)	Block blob	7 B	Available
cities2.txt	8/13/2026, 1:19:59 PM	Hot (Inferred)	Block blob	7 B	Available
students.csv	8/13/2026, 1:20:22 PM	Hot (Inferred)	Block blob	185 B	Available

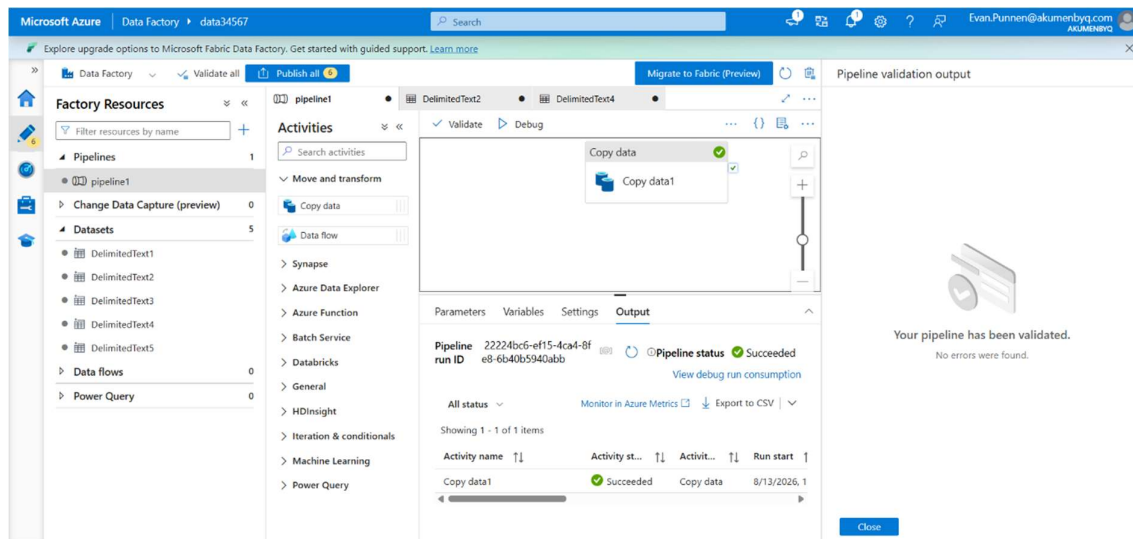

MICROSOFT AZURE

Step 8: Next Copying Data using Prefix

(we gave the prefix as “cit” to get the files starting with cit)

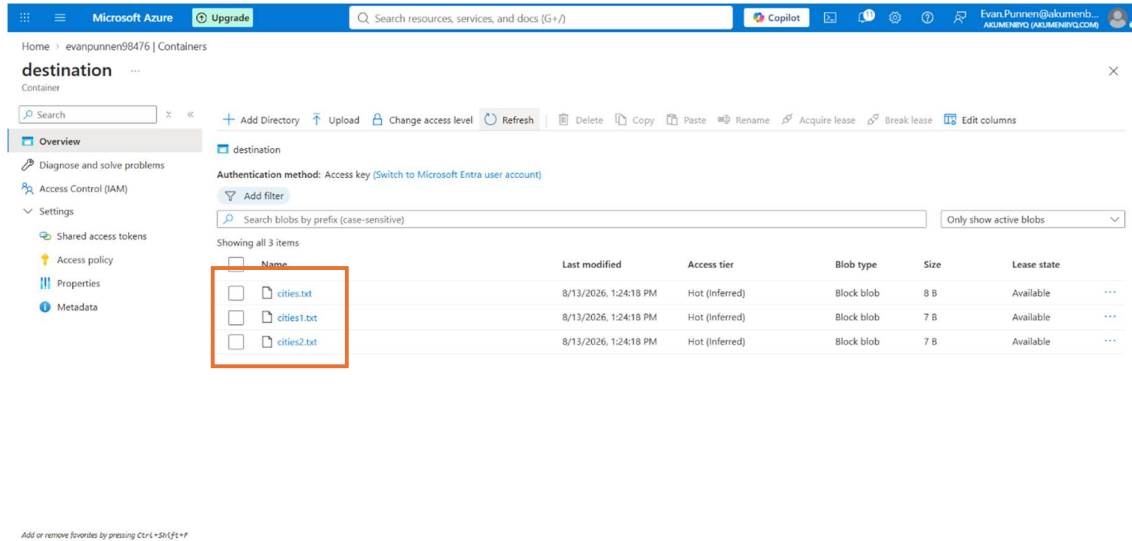

- Follow the previous steps selecting the source and destination path
- Validate and Debug

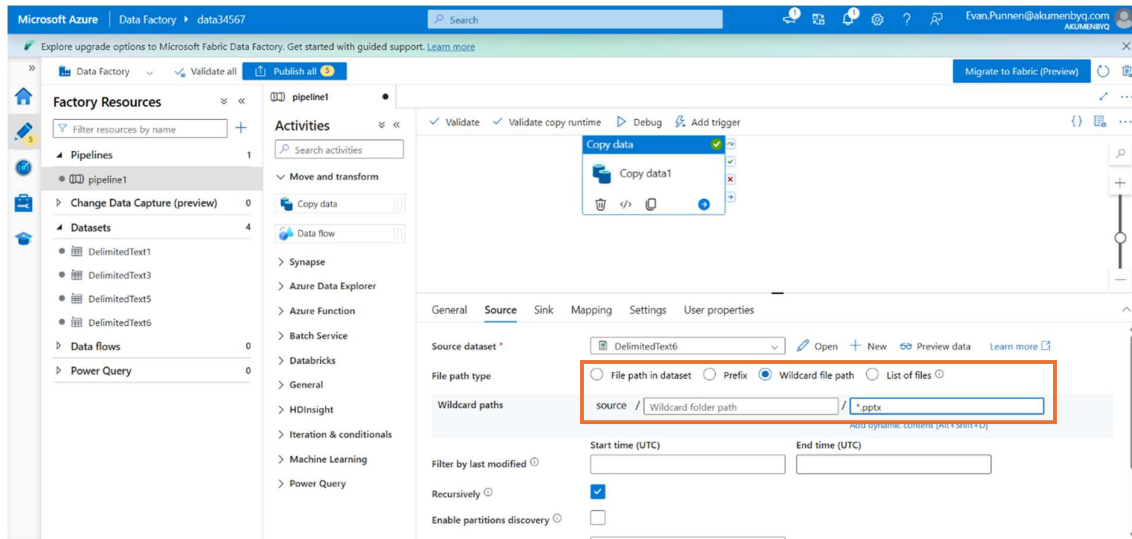

MICROSOFT AZURE

- All the file name which start with cit are copied to destination

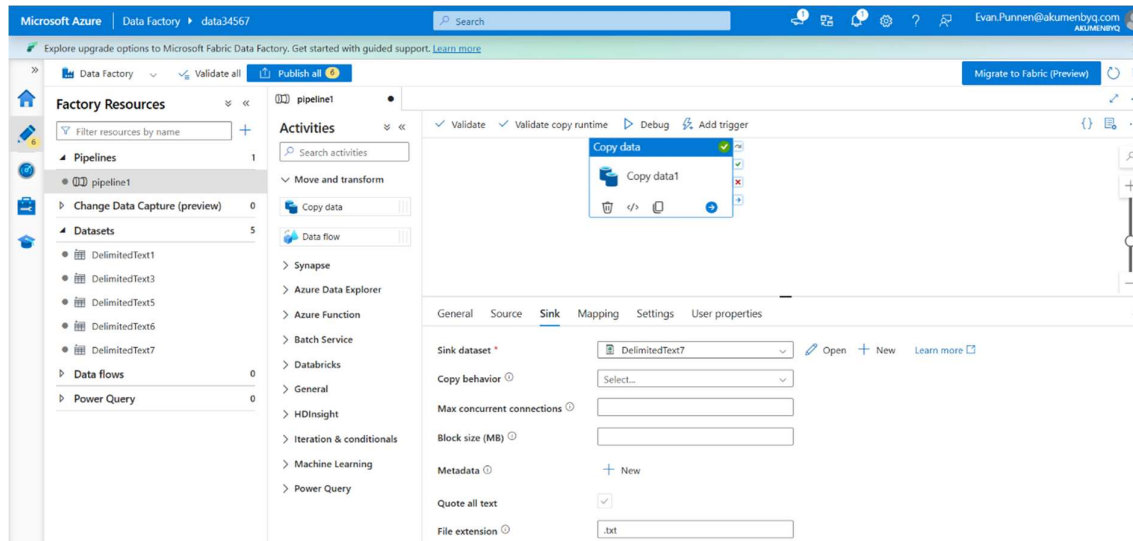

Step 9: Wildcard file path

- Copy the data by giving the file type (Eg. .pdf,.txt,.csv etc)
- Here we're going to fetch a .pptx file

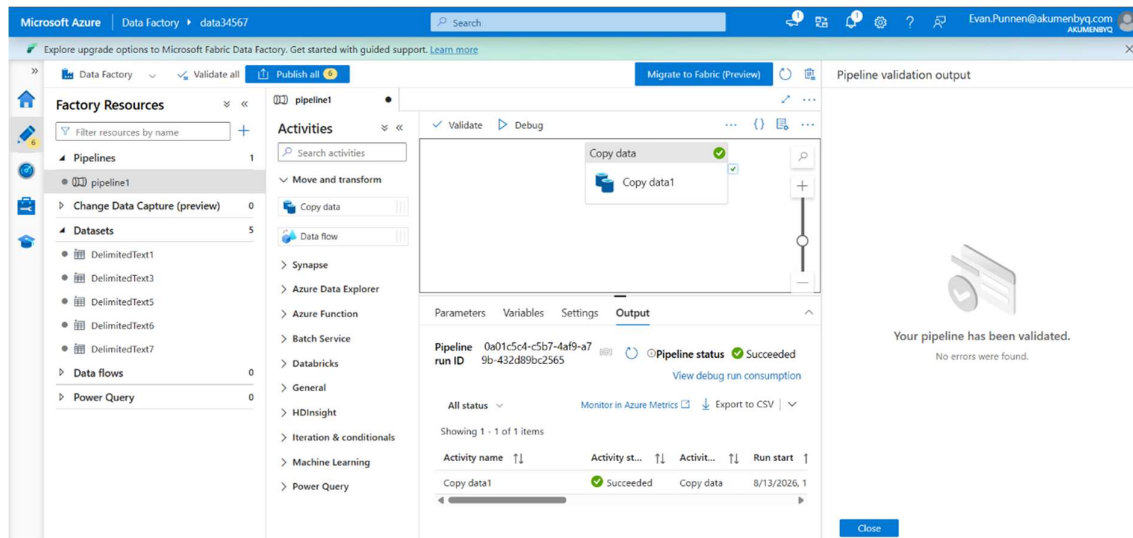

MICROSOFT AZURE

- Give the source and destination path

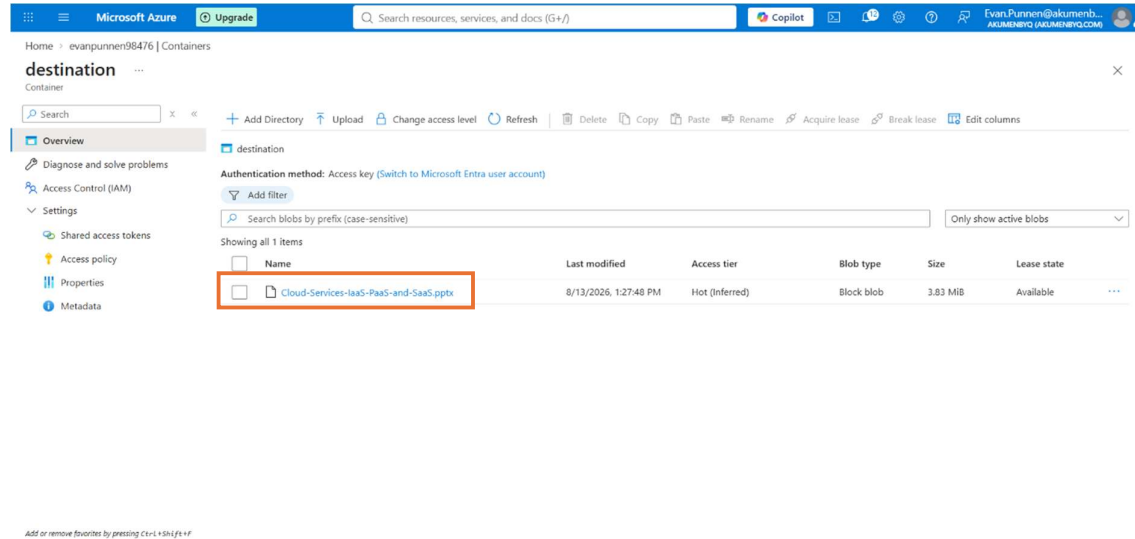

Validate and Debug the Pipeline

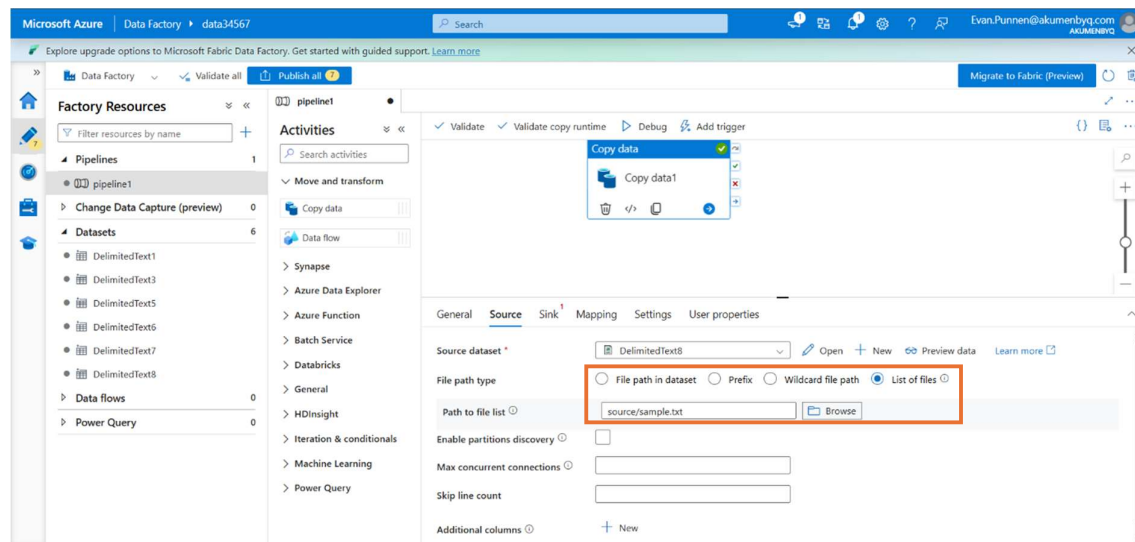

MICROSOFT AZURE

The file with the extension .pptx has been copied to the destination

Step 10: List of Files

- Browse and Select the List of Files Documents
- Give the File Paths

MICROSOFT AZURE

The screenshot shows the Microsoft Azure Data Factory interface. On the left, the 'Factory Resources' pane lists 'Pipelines' with 'pipeline1' selected. The main area displays the 'Activities' pane for 'pipeline1', showing a 'Copy data' activity. The 'Output' tab is active, showing the pipeline status as 'Succeeded' with a green checkmark. The 'Copy data' activity is also marked as 'Succeeded'. A 'Pipeline validation output' pane on the right displays a message: 'Your pipeline has been validated. No errors were found.'

All the files inside the sample.txt are copied to destination

The screenshot shows the Microsoft Azure Storage Explorer interface. The 'destination' container is selected, and the 'Overview' tab is active. A table lists the files in the container:

	Name	Last modified	Access tier	Blob type	Size	Lease state
☐	Cloud-Services-aaS-PaaS-and-SaaS.pptx	8/13/2026, 1:37:50 PM	Hot (Inferred)	Block blob	3.83 MiB	Available
☐	cities.txt	8/13/2026, 1:37:50 PM	Hot (Inferred)	Block blob	8 B	Available
☐	cities1.txt	8/13/2026, 1:37:50 PM	Hot (Inferred)	Block blob	7 B	Available
☐	cities2.txt	8/13/2026, 1:37:50 PM	Hot (Inferred)	Block blob	7 B	Available
