

Resource Setup: Created a resource group containing an Azure Data Factory instance (abc777) and an Azure Storage account (evanpunnen9847), and created storage containers including output2

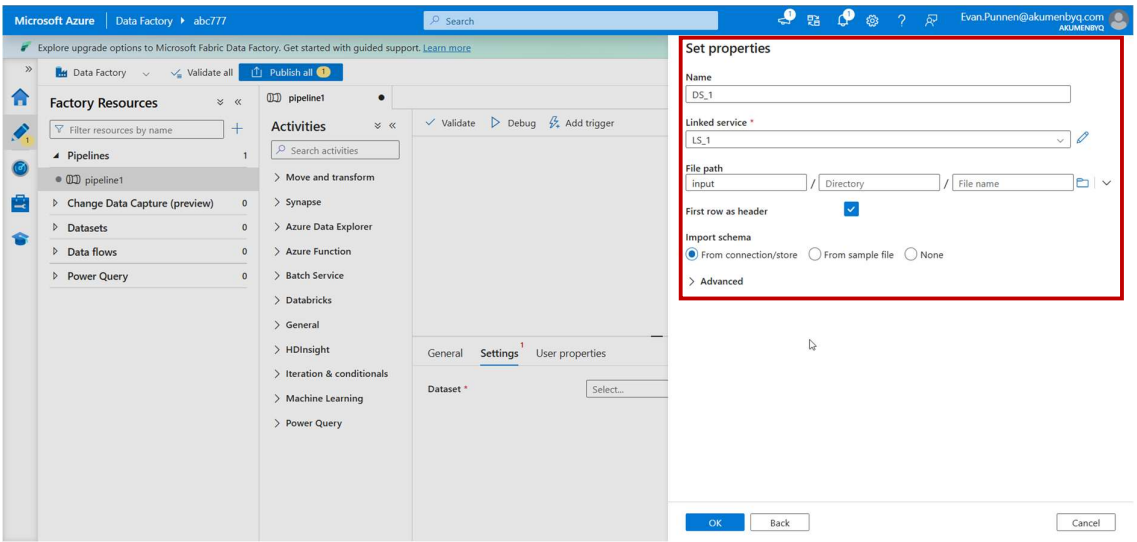

Data Upload: Uploaded three files (temp_1.csv, temp_2.csv, and weather_data.csv) into the input blob container.

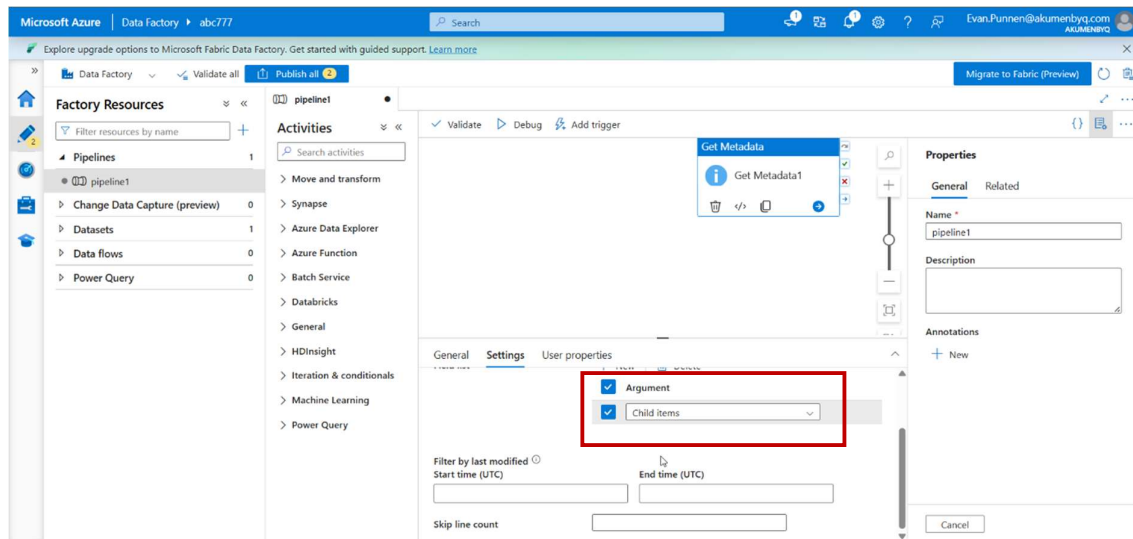

Linked Service Creation: Created a Linked Service (LS_1) in Data Factory to establish a connection to the Azure Blob Storage account.

Dataset Configuration: Configured a Dataset (DS_1) utilizing the linked service, pointing it to the input directory and enabling the "First row as header" option.

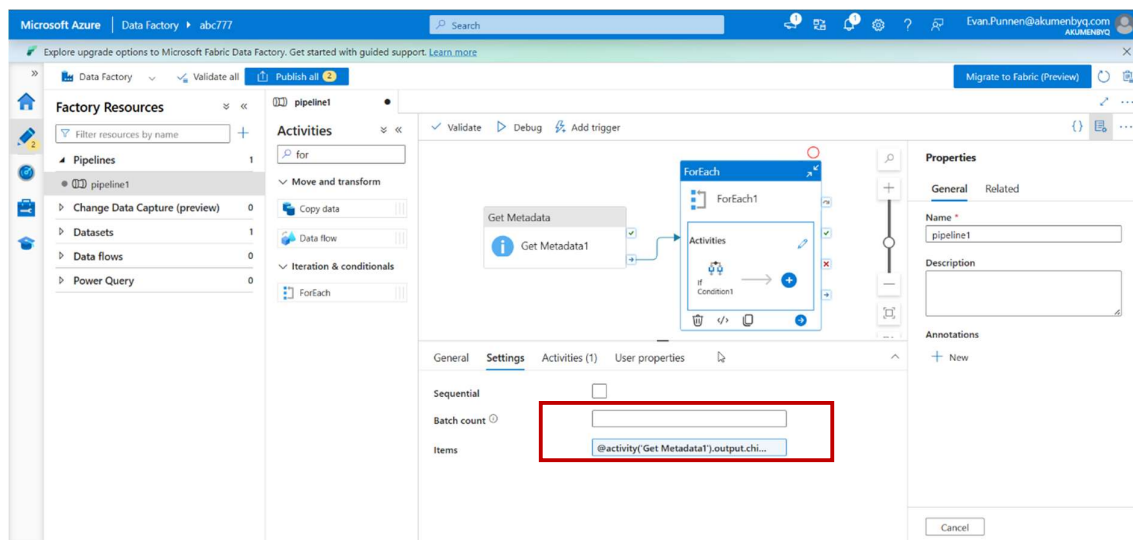

Pipeline Initialization: Created a new pipeline (pipeline1) and added a **Get Metadata** activity configured to retrieve the "Child items" (the list of files in the input directory).

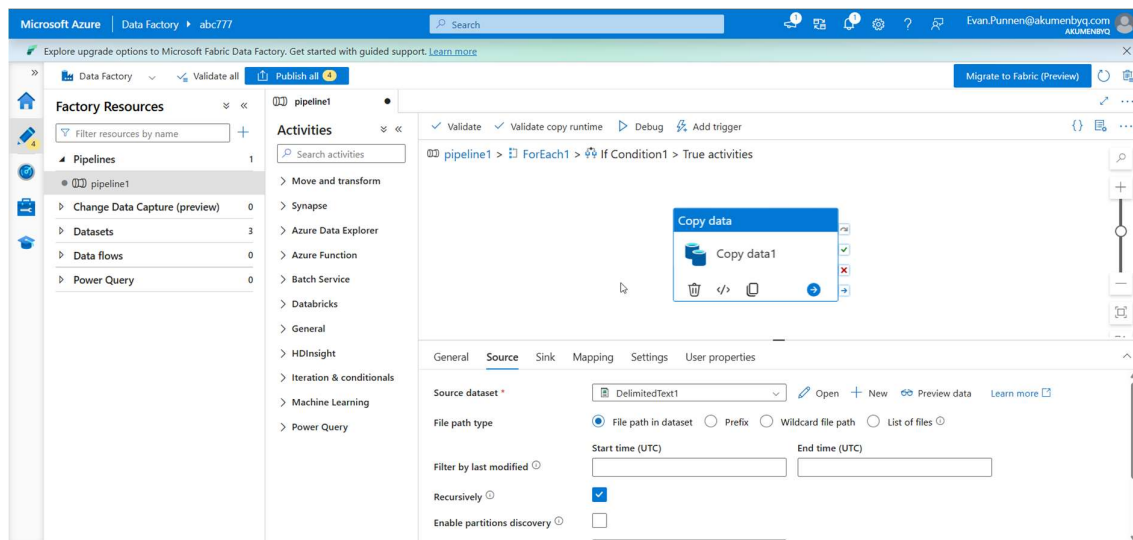

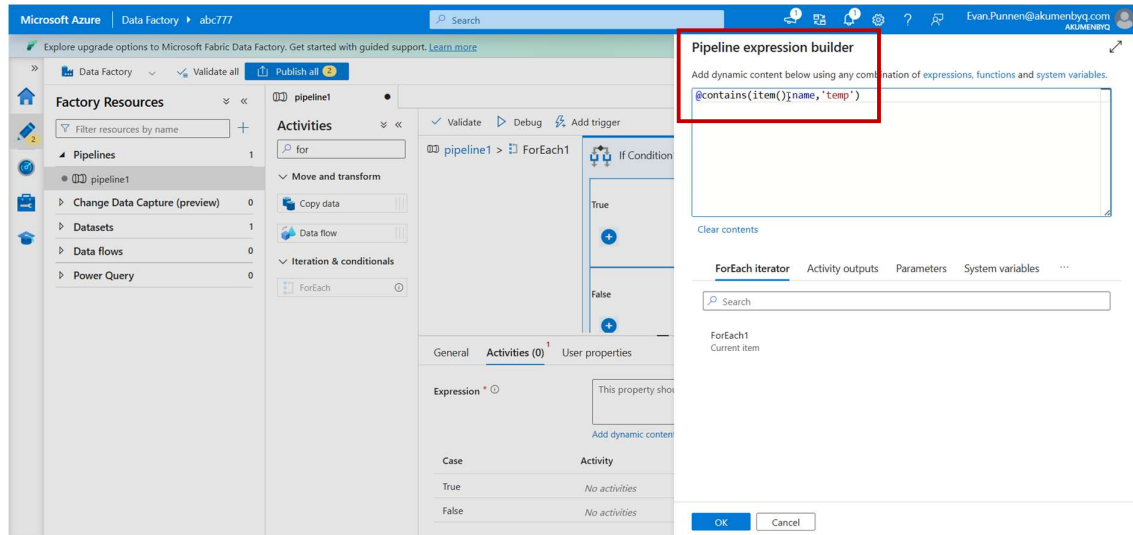

Iteration Setup: Connected a **ForEach** activity to the Get Metadata activity, configuring it to iterate over the files using the expression

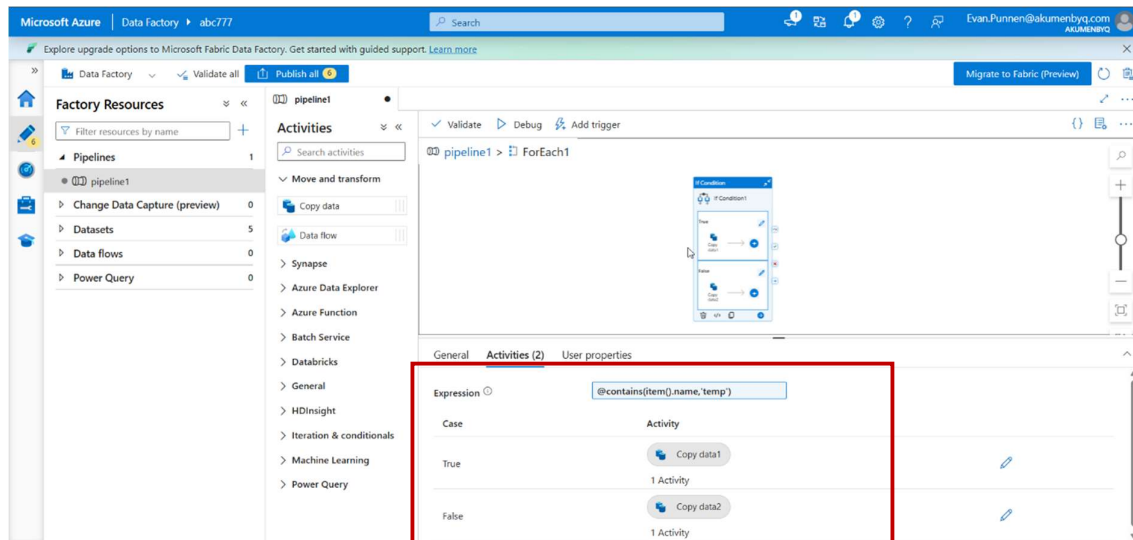

`@activity('Get Metadata1').output.childItems`

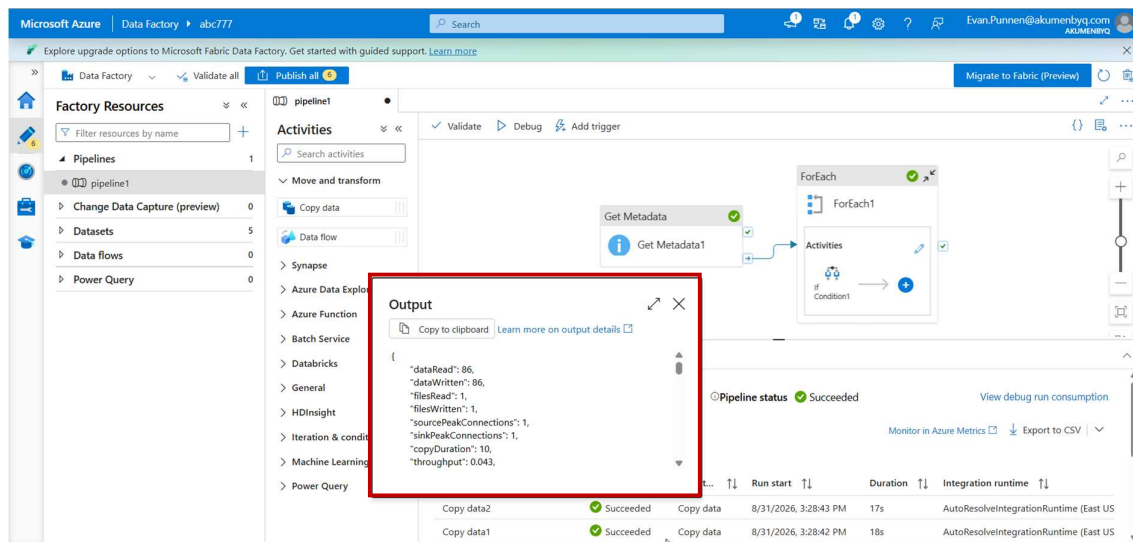

Conditional Logic: Inside the ForEach activity, added an **If Condition** configured with the expression `@contains(item().name, 'temp')` to check if the current file name contains the word 'temp'.

Data Copying Branches: Configured **Copy data** activities (Copy data1 and Copy data2) within the True and False branches of the If Condition to route the files appropriately.

Execution & Monitoring: Triggered the pipeline run and monitored the execution, confirming that the copy activities succeeded.

Factory Resources

- Pipelines 1
 - pipeline1
- Change Data Capture (preview) 0
- Datasets 5
- Data flows 0
- Power Query 0

Activities

- Move and transform
 - Copy data
- Synapse
- Azure Data Explorer
- Azure Function
- Batch Service
- Databricks
- General
- HDInsight
- Iteration & condition
- Machine Learning
- Power Query

Output

```
{
  "dataRead": 86,
  "dataWritten": 86,
  "filesRead": 1,
  "filesWritten": 1,
  "sourcePeakConnections": 1,
  "sinkPeakConnections": 1,
  "copyDuration": 12,
  "throughput": 0.043,
}
```

Get Metadata1

ForEach1

if Condition1

Pipeline status: Succeeded

	Run start	Duration	Integration runtime
data	8/31/2026, 3:28:43 PM	17s	AutoResolveIntegrationRuntime (East US)
Copy data1	8/31/2026, 3:28:42 PM	18s	AutoResolveIntegrationRuntime (East US)

Output Verification: Checked the destination containers, verifying that temp_1.csv was successfully placed in the output1 container and temp_2.csv was placed in the output2 container.
